

## Company Profile

## About US

**UNITED PARK** has taken on the mission of providing fully integrated solutions for water and sewage projects with a top notch after sales service and maintenance. Since establishing the company on the west coast of Saudi Arabia in 1989 in Jeddah . The first concern is and always has been to save their clients the liability of approaching several companies to install and operate their water applications. This has led **UNITED PARK** to be the top supplier of water applications in a range of regions starting its business from the Jeddah and extending it to Makkah , Madinah, Buraidah, Yanbu, Qunfudah, among other cities in the kingdom.

Being one of the leading companies in pump supply, thus gained the trust of their clients in terms of completely depending on **UNITED PARK** to take over their entire projects. Therefore **UNITED PARK** has developed an organized solid process to live up to their client's expectations starting from providing an initial free consultation to examine the project's elements in terms of geographic location, water salinity, project nature (whether it's a domestic use project or a commercial/industrial/ agricultural project), number of people benefiting from this project...etc. According to the feedback regarding these elements, Our teams Engineers who are highly experienced in domestic, irrigation, circulation, high pressure pumps & water desalination & industrial applications analyze the data given by the client and set a list of recommendations. Being in the business for over 30 years, **UNITED PARK** staff is able to give the ultimate solution costumed to the client's actual needs.

**UNITED PARK's** commitment to its client begins from providing high quality sturdy and resilient pumps that can last for a long time with minimum maintenance as well as providing an ongoing after sales service in order to guarantee the stability and efficiency of the client's projects. This service provided by technical staffs includes providing and installing original spare parts within 72 hours no matter where the project is located in order to maintain the functionality of the project without interruption or delay.

Having a great reputation upon its competitors, **UNITED PARK** has been highly recommended by consulting companies due to its devotion to the client's needs and concerns as well its commitment to its high quality level of service and products.

## MISSION

To supply the world's best brands of commercial building services products and fire fighting that provides safety and convenience for customers with relative competitive and affordable price , and all relevant technical support and service to achieve client satisfaction.

## VISION

To be recognized as the leading high- quality pumps supplier and servicing partner.

***Our experience in the water applications industry has lead us to create our own process that guarantees full understanding the client's needs in order to create a solution that meets his demands, sustains on its own with the lowest maintenance needed and operates effectively with the existing staff working on this solution.***

***Therefore, our services are represented to the clients in this order:***

### **Free Consultation**

A team of our experts meet up with the client; considering all the circumstances regarding the geographic location, the facilities, and the number of assigned staff, the nature of the project, the required training, and the number of habitants benefiting from this project in order to create the ultimate solution for this case.

### **24 month guarantee**

Ensuring the sturdiness and sustainability of the projects installed by our company; **UNITED PARK** provides a two years warrantee to its clients to maintain the client's trust that we as a supplier and a service provider are dedicated to helping the client in any circumstances they might face and in the fastest way possible.

### **After Sales**

As a crucial part of our service and loyalty to our client, we provide an ongoing after sales service with the client no matter how long the project has exceeded its warrantee and regardless of how far or how complicated the project is, this ongoing service lies in two aspects:

#### **• Maintenance:**

Clients purchase High Quality Pumps to ensure the pump performance as well as endurance, hence our Responsibility towards the client starts as soon as the pumps are delivered. Our Well trained Service Staff offer distinctive service and maintenance through wide range site coverage & professional Diagnostic. Using Original Spare Parts for pump repair and service, the Pumps Performance is restored. We provide preventive maintenance, service contracts, and proficient installations on either scheduled or prompt response basis. Minimum repair time is achieved by maintaining spare parts inventory. **UNITED PARK** devotes to providing the solution for any problem that the client encounters within the next 72 hours from problem initiation, so that the client doesn't have a problem pending for a long time.

#### **• Spare Parts:**

Since **UNITED PARK** has the largest stock of pumps, products and spare parts available, we are able to provide the client with the original spare parts needed in a short amount of time. This service helps us to earn the client's trust since they can rely on our expertise and availability to solve any problems that they might

Specialize in processing systems  
water pumps, fire and maintenance

# ABOUT UNITED PARK

UNITED PARK has taken on the mission of providing fully integrated solutions for water and sewage projects with a top notch after sales service and maintenance. Since establishing the company on the west coast of Saudi Arabia in 1989 in Jeddah . The first concern is and always has been to save their clients the liability of approaching several companies to install and operate their water applications. This has led UNITED PARK to be the top supplier of water applications in a range of regions starting its business from the Jeddah and extending it to Makkah , Madinah, Buraidah, Yanbu, Qunfudah, among other cities in the kingdom.

Being in the business for over 30 years, UNITED PARK staff is able to give the ultimate solution costumed to the client's actual needs.

## OUR VISION

To be recognized as the leading high-quality pumps supplier and servicing partner.

## OUR MISSION

To supply the world's best brands of commercial building services products and fire fighting that provides safety and convenience for customers with relative competitive and affordable price , and all relevant technical support and service to achieve client satisfaction

# THE VALUE OF UNITED PARK

-  A team of our experts meet up with the client; considering all the circumstances regarding the geographic location, the facilities, and the number of assigned staff, the nature of the project, the required training, and the number of habitants benefiting from this project in order to create the ultimate solution for this case.
-  During our testing and commissioning, we thoroughly check all aspects of your pump installation to make sure that it is ready to run . Our specialists can test and commission virtually any type pf pump system. We carefully inspect your system. Following our commissioning , your system will be running at absolute peak performance and as energy-efficient as possible.
-  As a crucial part of our service and loyalty to our client, we provide an ongoing after sales service with the client no matter how long the project has exceeded its warrantee and regardless of how far or how complicated the project is., this ongoing service lies in two aspects:
  - Maintenance
  - Spare Parts

UNITED PARK's commitment to its client begins from providing high quality sturdy and resilient pumps that can last for a long time with minimum maintenance also providing an ongoing after sales service in order to guarantee the stability and efficiency of the client's projects. This service provided by technical staffs includes providing and installing original spare parts in order to maintain the functionality of the project without delay.

Having a great reputation upon its competitors, UNITED PARK has been highly recommended by consulting companies due to its devotion to the client's needs and concerns as well its commitment to its high quality level of service and products.

# MESSAGE FROM UNITED PARK TEAM

## "Through Clients' Eyes."

It's a simple phrase. Maybe even a bit simplistic. But it is at the core of how we operate at UNITED PARK. These three words dictate our strategy, our approach to service, our approach to pricing.

We also make corporate responsibility a top priority. Our reputation for corporate integrity attracts great team members, great customers, and even greater opportunities. It is a key to our long-term success.

## Welcome

All of us at UNITED PARK appreciate being selected as the electromechanical equipments supplier for our customer. Complete customer satisfaction is our number one priority and we strive to exceed our customer's expectations by providing the highest level of quality equipments and exceptional customer support possible.

We are UNITED PARK teams of engineers and technicians committed to provide the best technical support and services and maintenance and be closely involved with each individual project and product leaves our shop floor. This is for one simple reason - you will judge our company not on its reputation for quality, but on how well our product performs for you and how after sales service be.

UNITED PARK TEAM

## OUR PARTNERS OUR PARTNERS ARE LEADERS

UNITED PARK are proud to partner with the largest manufacturers of pumps and pump solutions around the whole world. Our partnerships are built to be dynamic and flexible to improve quality of life for people and care for the environment.

Our Valued Partners.

Grundfos is the world's largest pump manufacturer, producing more than 12 million pump units, circulator pumps (UP), submersible pumps (SP), and centrifugal pumps (CR). In addition to producing electric motors for the pumps and electric motors for separate merchandising. Thus, it develops and sells electronics for controls for pumps and other systems.

Reflex Winkelmann GmbH is a leading solutions provider for the smooth operation of water based systems in building services. We have been successfully growing for a number of decades in this technically demanding and increasingly important market.

Established in 1988 part of the Concorde - Corodex Group, Bristol Fire Engineering, is the first firefighting equipment manufacturer in the Middle East and leader in innovative firefighting solutions.

We consistently apply value engineering to lower the cost of products, to streamline processes, and to improve efficiencies.

## Pumps for all purposes

Grundfos offers high quality products for efficient, energy-saving pump solutions.

### Heating and hot water service systems

Circulator pumps for circulation of hot water in central and district heating systems and circulation in domestic hot water service systems.

### Cooling and air conditioning systems

Circulator pumps for circulation of cold water and other liquids in cooling and air conditioning systems.

### Industrial applications

A wide range of multistage pumps for the transfer of water, cooling lubricants, and other liquids in industrial and process systems.

### Pressure boosting and liquid transfer

Vertical and horizontal, centrifugal pumps, and pressure boosting systems for liquid transfer and boosting of hot and cold water.

### Sanitary

Hygienic end-suction-centrifugal, rotary positive displacement, self-priming and multistage pumps for food, beverage, and pharmaceutical process systems.

### Groundwater supply

Submersible pumps for groundwater supply, irrigation and groundwater de-watering.

### Domestic water supply

Submersible pumps, jet pumps, multistage centrifugal pumps and compact systems for water supply in homes, gardens, and hobby applications.

### Sewage and wastewater

Drainage, sump, effluent and sewage pumps for a wide range of applications in building services.

### Environmental applications

Purpose-built submersible pumps for remedial pumping of contaminated groundwater and for groundwater sampling for water quality analyses.

### Dosing/Disinfection

Dosing pumps and disinfection generators for water treatment systems, RO, cooling and heating, swimming pools, process industries, food and beverage, water supply and wastewater.

**CM**

The CM or CME pump is a multi purpose pump for both industry and water boosting in general. It is compact, noiseless, reliable and flexible, and this make it an optimal solution for installation and interaction with other components in small and

**CR**

The Grundfos CR vertical, multistage, centrifugal in-line pump family works for water supply, water treatment and almost any industrial solution – including those for high-pressure, hot, dangerous, flammable and aggressive liquids.

**NB**

Grundfos end-suction pumps are multi-purpose pumps suitable for a variety of different applications requiring reliable and cost-efficient supply. End-suction pumps are used in five main areas of application: water supply, industrial pressure boosting, industrial liquid transfer, HVAC and irrigation.

**NK**

Grundfos NK end-suction pumps are multi-purpose pumps suitable for a variety of different applications requiring reliable and cost-efficient supply. End-suction pumps are used in five main areas of application: water supply, industrial pressure boosting, industrial liquid transfer, HVAC (heating, ventilation and air-conditioning), and irrigation.

**HS**

The Grundfos HS horizontal split case pump is a single-stage, non-self-priming, between bearing, centrifugal volute pump. Grundfos HS horizontal split case pumps are typically used in these applications: Air-conditioning, heating systems, Public water supply, District cooling/heating plants, Cooling systems, Public waterworks, Process cooling, Irrigation.

**SEG**

The SEG range of grinder pumps is specifically designed for pumping effluent and untreated sewage. The Grundfos SEG pumps are designed for pumping untreated wastewater from domestic, commercial or municipal sources. The high discharge pressure enables transfer of wastewater over longer distances.

**UNILIFT AP**

The Unilift AP and Unilift AP Basic are submersible drainage pumps designed for both temporary/portable installation and permanent free-standing installation. These single-stage pumps are made mostly of stainless steel. All types are available in either single phase or three phase versions and for 50 or 60 Hz power supply.

**SL1 / SLV**

The SL pump is designed for the transfer of drainage and surface water, domestic, municipal and industrial wastewater, and process water. The SL pump is also available in an explosion-proof (Ex) version. SL pumps are available in variants with a stainless steel impeller for aggressive environments.

**UPS**

UPS pumps constitute a complete range of 3-speed circulator pumps, available both in 50 and 60 Hz.

The pumps can be used in both open and closed systems. UPS pumps are of the canned-rotor type, i.e. pump and motor form an integral unit without a shaft seal and with only two gaskets for sealing.

**S PUMP**

S pumps form the backbone of many sewage systems. They are selected for their strength, their durability, and for innovative features such as the Smart-Trim impeller clearance adjustment system and the Smart Seal for leakage prevention.

**MAGNA**

The MAGNA3/UPE pumps make up a broad range of small, medium and large circulator pumps – all fitted with communication equipment and state-of-the-art motors. These high performance pumps are perfect for high performance building systems, and fit both heating and cooling applications.

## PRODUCTS

### REFIX DE PRESSURE TANK

WRAS approved bladder expansion vessel for mains water supply systems. Replaceable bladder according to DIN EN 13831, all vessel parts in contact with water are coated against corrosion, durable external powder coating finish, vessels from diam.1000ltr with pressure gauge integrated in the gas compartment

### REFIX DC PRESSURE TANK

WRAS approved diaphragm expansion vessel for use in mains water supply systems. Ideal for use in water systems with higher corrosion resistance requirements, as suitable for brine circuits in heat pump systems. Non-replaceable diaphragm, water-bearing parts corrosion resistant, durable powder coated external finish

### REFLEX EXVOID AIR SEPARATOR

Reflex Exvoid, air/microbubble separator for heating and cooling systems respectively for sealed system circuits. Suitable for use with water and water/glycol mixture to a maximum of 50% concentration. Removes circulating free air and gas bubbles with high efficiency from the system flow. Permanent evacuation by way of integrated Exvoid-T automatic air vent with high venting capacity.

### REFLEX EXDIRT DIRT SEPARATOR

Suitable for use with water and water/glycol mixture to a maximum of 50% concentration. Fitting for the removal of dirt particles up to a size of 5,0 µm out of the liquid flow by way of a specifically designated insert. The collection area can be easily emptied at regular intervals using a drain ball valve while the system remains in operation. The flanged collection chamber can be removed for inspection.

### REFLEX G EXPANSION TANK

Reflex G, bladder expansion vessel for sealed heating and cooling systems, built according to EN 13831. Approval according to EC Pressure Equipment Directive 97/23/EC. Construction on profile or tubular feet, durable external epoxy powder coated finish, replaceable bladder, pressure gauge in the nitrogen compartment

### REFLEXOMAT PRESSURIZATION UNIT

Reflexomat control unit, for single compressor pressurization units with auxiliary possibility of monitored automatic water make-up for central heating and chilled water systems. The device is built according to EN 12828 and is provided with the EC marking. The pneumatic part of the pressurization unit is provided with an oil free air compressor in conjunction with a solenoid valve as an air discharge.

## PRODUCTS

### FIRE ALARM

- Combined Smoke and Heat Detector Multi Sensor Detectors.
- Electronic Sounder and Beacon.
- Fire Alarm Bell.
- Fixed-Type and Rate-of-Rise Heat Detector.
- Manual Call Point.
- Photoelectric Smoke Detector
- Smoke & Heat Detector Series

### CABINET

- Bristol Cabinets have an attractive and compact design with universal high quality standards. Bristol Cabinets can be surface mounted or recessed with architrave and 180° swinging action doors. Bristol Cabinets come in Mild Steel finish or Stainless Steel finish.
- Breaching connection cabinet
  - Horizontal / Vertical double cabinet.
  - Single cabinet.

### FIRE PUMPS

Bristol Fire Pumps and accessories are engineered to meet, or exceed, all applicable codes, including: UL and ULC listings, and NYBSA approvals, NFPA, VdS, LPCB, CNBOP and CE certifications worldwide and all NFPA-20 standards.

- End suction pumps.
- Horizontal split case pumps.
- Vertical turbine pumps.

### EXTINGUISHERS

Bristol extinguishers are designed for protection of fire hazards. These compact and portable extinguishers are suited for both industrial and commercial fire protection needs.

- Water.
- Wet chemical.
- Powder.
- Foam.
- CO2.

### SPRINKLER SYSTEMS

Automatic wet sprinkler system. Wide range of sprinkler heads suitable for various types of hazards. Designed to NFPA 13 standards. UL Listed & FM Approved.

- Concealed Sprinkler.
- Horizontal Sidewall.
- Upright Pendent

### FIRE HYDRANT

Fire Hydrant with form of dry column, whose column empties itself automatically when it closes the main valve to protect against frosts, designed to supply water for the fight against fires during all the phases of the same one.

- Dry barrel hydrant.
- Dry barrel hydrant UI/FM.
- Wet hydrant.

# WHAT WE DO SERVICES

Our experience in the water applications industry has led us to create our own process that guarantees full understanding the client's needs in order to create a solution that meets his demands, sustains on its own with the lowest maintenance needed and operates effectively with the existing staff working on this solution.

UNITED PARK devotes to providing the solution for any problem that the client encounters within the next 72 hours from problem initiation, so that the client doesn't have a problem pending for a long time.

Clients purchase High Quality Pumps to ensure the pump performance as well as endurance, hence our Responsibility towards the client starts as soon as the pumps are delivered. Our Well trained Service Staff offer distinctive service and maintenance through wide range site coverage & professional Diagnostic. Using Original Spare Parts for pump repair and service, the Pumps Performance is restored. We provide preventive maintenance, service contracts, and proficient installations on either scheduled or prompt response basis. Minimum repair time is achieved by maintaining spare parts inventory.

## REPAIR & MAINTENANCE

Our teams of highly skilled Repair & Maintenance service technicians can resolve any pump problem you may have. With unbeatable professional industry and application know-how, we ensure your system stays up and running, so you get a little extra performance out of every pump.

- Onsite repair
- Pump check
- Workshop repair

## SPARE PARTS & SERVICE KITS

Spare parts & Service kits are original, high-quality Grundfos components. We provide 24/7 worldwide delivery, so you know that throughout the entire lifecycle of your pumps, you can count on us to deliver a little extra precision and reliability.

Fully documented for recommended spare parts for optimal pump reliability

Service kits with flexible ordering and delivery options.

## TETSING & COMMISSIONING

During our testing and commissioning, we thoroughly check all aspects of your pump installation to make sure that it is ready to run .

Our specialists can test and commission virtually any type of pump system.
