ABOUT US

Mina Excellence is considered to be one of the fastest-growing telecommunications companies in the Kingdom of Saudi Arabia. Since then, the organization has continued to provide communications and information technology, such as broadband and interconnection networking, cloud services, information security, managed services, digital device, and Internet services, all at unprecedented international levels for all of its customers from governmental, business and operator sectors.

“we considered to be one of the fastest-growing telecommunications companies in the Kingdom of Saudi Arabia.”

“ make a exceptional products, equipments and services in many industries. ”

Mina Excellence believes that technology is now at the forefront of tools that help empower individuals and organizations around the world, therefore our most fundamental values are:

Discover opportunities to create transformation and make a change.

Use our knowledge and expertise to support positive change.

Enabling people to produce new and effective developments.

Mina Excellence aspires to attract customers of all categories and be their first choice when looking for increasing investment revenues in the field of ICT, reduce the total property cost to enable and simplify all processes related to this field, ensure quality and continuity. To achieve that, we seek to listen permanently to the needs of our current and future customers, respond and to deal with the changes with complete flexibility to adapt to all advanced and constantly renewable technologies, and apply the best global solutions. The advantages of choosing Mina Excellence as a provider of information and communication services are: We consider our customers the most important element when holding a partnership with a senior team of IT specialists. Our customers enjoy the freedom that helps them focus on what they are good and adept at. Our customers have access to the best IT experts and the latest technology at the best cost. We have measurable performance indicators that enable our customers to enjoy peace of mind. Our customers will always have a high competitive advantage in their sector or field. We introduce 24-hour access and support through the website. We provide our customers with the flexibility to match their IT infrastructure with their requirements.

OUR VISION

WHO ARE WE

Mina Excellence for Technical Solutions is a company specialized in communications and information technology, information security, and innovation of advanced technical solutions. We provide vital services, specialized support, and are interested in providing you with all needed integrated solutions in addition to providing services for the business of middle markets and providing consulting and strategic services for agribusiness corporations. Mina Excellence can provide both direct and advisory solutions as needed as we help organizations and agribusiness corporations adapt their technical services to their business requirements.
