1. OFFICE OVERVIEW

MESSAGE FROM CHIEF EXECUTIVE OFFICER

H & K GROUP is a group composed of committed engineers with expertise and proficiency. Driven by passion, performance and innovation. We deliver the ultimate quality of engineering services to our valuable clients which includes interior design, furniture and fit out , design supervision, construction management and project management with the pursuit of excellence and growth in delivering luxury. Our Company is engaged in development and research to provide the best solutions for all our clients.

CEO

WHO WE ARE

We provide planning and design services for all types of buildings including administrative, commercial, residential, sports and also the reconstruction of existing buildings. This covers both exterior and interior, beginning with an architectural study and ending with the finished project. As chief designers we cover the total project preparation for the necessary legal procedures required for land and building approval and building inspection service. Our staff provides a broad range of professional services, with exceptional performance and extraordinary attention to detail. With a passion for excellence, expressed through design, H & K GROUP prides itself on helping clients envision projects that meet their needs and then turn that vision into reality.

OUR VISION:

Our vision is to create a non- stop solution provider for interior design, project management and renovation services.

OUR GOAL:

Our ultimate goal is to ensure the services we provide are up to the best possible standards, committed to strive their very best to meet, and to always exceed client expectations by actively communicating their thoughts and ideas.

ENVIRONMENTAL POLICY

H & K GROUP Statement

H & K group adheres on the maximum importance of environmental issues and seeks to improve environmental performance. We aim to meet and where possible exceed the requirements of relevant environmental legislation and codes of practice. We will try to reduce pollution, emissions and waste. It is our aim to reduce the consumption of primary raw materials and improve energy and resource efficiency. We will work closely with clients, consultants and suppliers to encourage and promote environmental issues. We will continuously seek to improve environmental performance through regular review of our policy and its impact on the environment. This will be monitored on a regular, annual basis during management and staff meetings.

H & K Environmental Policy:

- We recognize that our operations have an effect on the local, regional and global environment. We will ensure that all staff are trained in our environmental management policy and given guidance in its implementation.
- As a consequence of this, the management is committed to continuous improvements in environmental performance and the prevention of pollution. The company is responsible for the implementation and monitoring of this environmental policy.
- Current environmental regulations, laws and codes of practice will be regarded as setting the minimum standards of environmental performance.
- We will implement measures to help the business and its employees to use 'green transport', for example, providing facilities for cyclists, encouraging car sharing, and encouraging the use of public transport by providing information on local routes.
- •The Company seeks to encourage staff to reduce fuel consumption and lower exhaust emissions. This is a main consideration in purchasing company cars.
- We will dispose of all waste in a responsible manner, ensuring that we always comply with the Duty of Care Regulations. Any services used for the storage or disposal of waste will be checked to ensure that appropriate licenses are held.
- Our policy is to promote recycling and the use of recycled materials whilst reducing consumption of materials. Our aim is to reduce our impact on the environment through conservation, efficient use and careful planning of resources and activities.

ENVIRONMENTAL POLICY

- •In the office environment, paper will be used sensibly, with measures to re-use and recycle waste paper, and the increased use of electronic communication to reduce the need for paper use.
- •We will ensure that dust, noise and odor do not cause a nuisance to the community surrounding the place of business or site on which we are working.
- •We will ensure that no polluting matter enters surface waters or groundwater and before commencing any works we will check the area for endangered species, protected plant species, trees subject to a Tree Preservation Order, and protected archaeology.
- •We will try to reduce the energy and water consumption of the business and minimize CO2 emissions. We will invest in the improved energy efficiency of products we use and investigate environmentally safe and sustainable energy sources.
- •H & K GROUP adheres to the rules and regulations set by the Kingdom of Saudi Arabia. As leading company, we aim to develop and maintain a high level of sustainability awareness, whilst continuing to improve performance. We recognize the importance of our contribution to economic growth, environmental protection and improved quality of life through the design and specification of sustainable materials and methods. Equally, we recognize the need to enhance and protect the environment, whilst using resources in a way which will not be detrimental to future generations.
- •We will try to use sub-contractors and suppliers who comply with the requirements of our environmental management policy, and will help subcontractors and suppliers to comply with environmental laws and regulations as much as possible.
- •The company is well aware of its responsibility for the community in sharing information regarding environmental topics or issues for public awareness and as such, we are committed in developing strategies to advertise and implement to the best of our abilities the goal of maintaining and improving the world we live in.

Signed by the management of H & K GROUP on FEB. 20

PROFILE AND ACHIEVEMENTS

ARCHITECTURAL PROJECTS

As architects and designers, it is our job to create more thoughtful and dynamic spaces that nurture end-users innate curiosity and creativity We believe architectural place is the perfect breeding ground for building healthy behaviors, mostly because it is the center of end-user's activities.

EDUCATIONAL BUILDING DESIGN

Location: Muzahamiya - Saudi Arabia

Area: 24,500 m2

DESCRIPTION

The entire building has a pedagogic function, apart from the classrooms, the model seeks to potentiate the appearance of interstitial spaces between the classrooms which expand to define spaces as the prolongation of the classrooms, places for thought, for union, for friendship. Each and every one of the courts and places between the classroom modules defines itself with an educative, sensorial and dynamic theme.

PRIVATE RESORT

Area: 5000 m2

DESCRIPTION

A vacation resort design on a rural landscape area with modern designs and several approaches of main villa and guest houses.

PROFILE AND ACHIEVEMENTS

GOVERNMENTAL AND ADMINISTRATIVE PROJECTS

Administrative spaces are the physical manifestations of economic, demographic and cultural forces. The changing nature of working places is transforming spaces into open, flexible locales where separate professions and disciplines more easily converge. The changing demographic of workers is altering designs to be more comfortable, social and collaborative with technology. For these and other reasons, spaces of innovation help elevate what matters in today's economy, making them the places to watch, and sending helpful signals to cities and suburbs aiming to become more competitive.

MINISTRY OF DEFENSE - DAWADMI 400 & 700 - DESIGN AND SUPERVISION

Location: Dawadmi - Saudi Arabia

Area: 15,334 m2

DESCRIPTION

Office spaces often give metal pressure to those who work in them by a bland and rigid atmosphere. While the existing lobbies were just passages before getting to the destination, here, people gather round to chat and have a light snack, or even hold lectures and seminars. The steps are not just a link between two spaces but a destination itself, an open cultural space for diverse functions. Such an approach was also applied to the steps and meeting rooms on each floor so that the employees could liberally communicate, debate with each other and interchange information whenever and wherever they want.

MINISTRY OF DEFENSE - DAWADMI 400 & 700 - DESIGN AND SUPERVISION

Location: Dawadmi - Saudi Arabia

Area: 15,334 m2

MINISTRY BUILDING OFFICES - MOMRA

Location: Al Riyadh - Saudi Arabia

Area: 19,296 m2

DESCRIPTION

The relaxation areas on each floor show careful consideration on the users with its sensitive design. The vivid color plan of the cafeteria catch the attention. With its consideration on details, this aims to be a unique and pleasant office that would help the employees show their creativity.

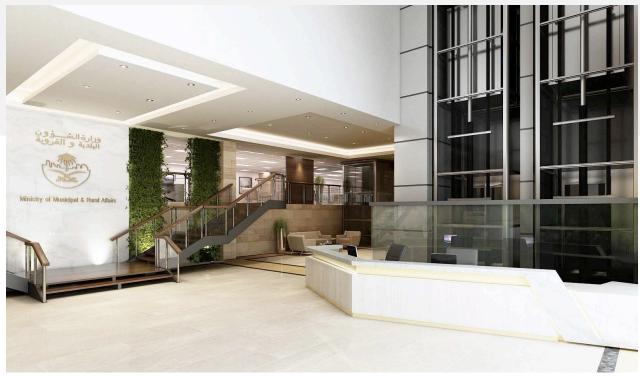

MINISTRY BUILDING OFFICES - MOMRA KING SAOUD BUILDING - KSU

Location: Al Riyadh - Saudi Arabia

Area: 22,000 m2

DESCRIPTION

The unity of materials used on the interior and exterior allows the ambiance outside flow into the inside, creating a more natural and comfortable atmosphere. Modern colors also elevate the spatial quality. The translucent glass used on the exterior wall could also be found on the inside; the translucent inner partition secures the privacy and the transparent glass opens up the space. Each room is furnished with various furniture, lighting fixtures and other detailed elements.

PETRO SAUDI HQ

Location: Al Riyadh - Saudi Arabia

Area: 520 m2

DESCRIPTION

The interior design focuses on providing a comfortable workspace for the employees. The daylight was drawn into the interior to make a pleasant working environment, and each floor was highlighted by different colors to increase the spatial recognition. Such a color plan was also applied on furniture to strike a balance and produce a visual pleasure.

KING FAISAL OFFICES

Location: Al Riyadh - Saudi Arabia

Area: 460 m2

DESCRIPTION

The new office design proposes a sensuous space to stimulate the creative ideas and infinite imagination of its employees. The meeting rooms uniquely provide a separate zone for quick decision making, and has been designed in various manners to allow people to sit comfortably and have a conversation.

PROFILE AND ACHIEVEMENTS

HEALTHCARE PROJECTS

Sustainability must be a consideration for the design of all health care facilities. Many sustainable design features can be incorporated into health care facility design, including day lighting, energy and water conservation, nontoxic materials and finishes, and sustainable operations and maintenance. Flexibility must be a basic feature of any new health care facility to keep it from rapid obsolescence in the face of changing needs and technologies. Health care facility needs are evolving rapidly, and the direction of that evolution is difficult to forecast with any certainty. New equipment technologies, new treatment methodologies, changes in diseases, and changes in the patient population base all impact the facilities that house them. Inpatient care is steadily being reduced while outpatient services are growing. There is increasing emphasis on special-care units and smaller satellite facilities rather than large, centralized facilities

PROTOTYPE HOSPITAL 300 AND 500 BEDS

Location: Abha - Saudi Arabia

Area: 3,110 m2

DESCRIPTION

The Center for Health and Wellness boasts a new prominence along the city's central corridor and a welcoming presence for the community at large. New spaces include medical facilities, offices, and conference rooms; break rooms and other support spaces. The design is relaxed, happy, and comforting while the selected materials are durable enough to meet the maintenance needs of a health care facility.

KING SAUD MEDICAL COMPLEX

Location: Al Riyadh - Saudi Arabia

Area: 734 m2

DESCRIPTION

We featured our built and imagined spaces, which aim to improve the social and economic health of our users. Achieving social mobility and class transcendence plays a role in how we, as architects, think about ourselves, especially here.

BEAUTY CLINICS

Location: Al Riyadh - Saudi Arabia

Area: 1,600 m2

DESCRIPTION

This beauty clinic is characterized by the simplicity coming from the moderated expression, is possibly the most noticeable style today. Such an approach creates a sense of openness and adds an excitement to the spatial experience. By minimizing the number of the finish material, the designer simplified the space, where facilities are centered to provide privacy to a limited number of users.

AL-SALAMAH HOSPITAL

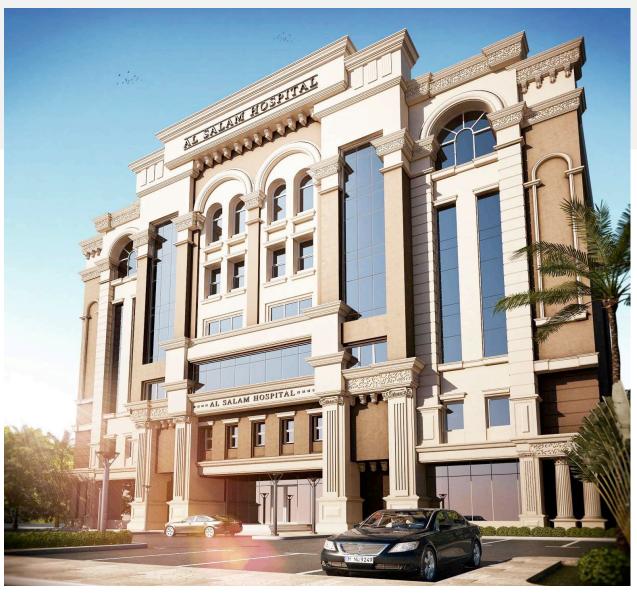

Location: Al Riyadh - Saudi Arabia

Area: 10,235 m2

DESCRIPTION

The building is designed to improve patient and staff flow, communication, and convenience.

- Use of modular planning concepts to create truly flexible practice spaces for providers.
- Integration and use of daylight into the interior spaces by thoughtfully locating waiting areas, check-in/check-out points, and corridors with access to exterior windows
- Use of collaborative work space for providers "on-stage" areas for focused work while providing care to patients, and "off-stage" areas for private time between patients.

PROFILE AND ACHIEVEMENTS

HOSPITALITY PROJECTS

Hospitality interior design covers a wide range of duties and tasks, from the floor plan to the color of the walls and the style of furniture. All of these aspects carefully curated and pieced together can ensure a cohesive and unique feel in the space. Decisions should go hand-in-hand with the main objectives and core values of the establishment such as; providing excellent amenities and services, going above and beyond simply providing a great night's sleep. Based on this thought process, our team might pick a bright, vibrant color pattern combined with modern furniture, innovative and more provocative decorative accents or we might select a subtle, more muted and sophisticated color palette. Those elements might be paired with plush furniture and demure wall decorations to trigger feelings of calm and comfort while still providing an upbeat and cheerful underlying design spirit.

AL-SALAMAH HOTEL

Location: Al Riyadh - Saudi Arabia

Area: 2,319 m2 DESCRIPTION

Hotels of this case emphasize protection and utilization of natural environment, beginning from the principle of creating a harmonious and beautiful residential atmosphere, deepening those beneficial environmental elements and guiding the integrated planning and design for architecture, landscape and the interior. The original unconscious spontaneously built hotel is transformed into consciously innovated residential environment beneficial to people.

The coordinated planning forms harmonious and agreeable group, more naturally expressing the internal natural pattern of the hotel area, and creating a private atmosphere differing from others.

PROFILE AND ACHIEVEMENTS

COMMERCIAL PROJECTS

Designing Commercial Interiors is the industry standard reference, now fully revised and expanded to reflect the latest developments in commercial interior design. H & K guides you through the entire design process, from planning to execution, to inform you of the vital considerations that will make your project a success.

Commercial interior design entails a much more complex set of design factors than residential design, and many of these considerations are matters of safety, law, coverage of accessibility, security and codes.

SALON

Location: Al Riyadh - Saudi Arabia

Area: 500 m2

DESCRIPTION

A hair salon has a complex circulation pattern owing to the different actions that take place simultaneously. Thus organizing the circulation flow should come first above all else in order to provide convenience to both customers and employees. The harmonious space is a result of a multi-faceted approach based on the research on the areas with complex circulation. The project consists of two levels; the areas for hairstyling and shampooing are located on the spacious basement floor, and those for makeup, and other additional zones on the first floor.

CINEMA

Location: Al Riyadh - Saudi Arabia

Area: 2,200 m2

DESCRIPTION

Walls, furniture and floors were designed to optimize the cinematic experience while maintaining a unique character. We also salvaged scraps of fabric from the original wall coverings and carpets to recreate the theater's rich color palette. The theatre may also function as modern broadcast studios. The foyer has a small seating area with cafe bar serving light refreshments. Designers decided to create envelopes housing different functions which include a hall, a cinema and a VIP lounge. A monolithic body with a seemingly smooth and reflective surface forms the skin of the movie theater communicating the special character of its interior to visitors.

PROFILE AND ACHIEVEMENTS

RESIDENTIAL PROJECTS

As architects and designers, we have an important job, building structures that will fulfill people's needs while being structurally safe and sound. But here's the thing; you can create the greatest building in the world but nobody's going to use it if the inside is a mess. Interior design is an integral part of architecture, focused on creating interior spaces that make the building both functional and aesthetically appealing. Still, we have different kinds of buildings, so it makes sense that we have different kinds of interior designs. One of the biggest arenas for designers is residential design, or the interiors of spaces in which people live. This can include houses, apartments, condos, and anywhere else where people reside. The architect may build the house, but it's the designer's job to make it a home.

PRIVATE VILLA

Location: Al Riyadh - Saudi Arabia

Area: 1,800 m2

DESCRIPTION

Varied and flexible villa type. Taking the features of traditional villa and house and combining the demands of contemporary elites toward modern life, it offers different villa types and house types for different classes.

PRIVATE VILLA

Location: Al Riyadh - Saudi Arabia

Area: 1,566 m2

DESCRIPTION

Architects optimize the general layout and construct high-end space, adopting the detailed design methods including elevating the entrance, studying on the hallway, creating micro space, echoing between exterior and interior, as well as micro topography to build high quality environmental experience.

PALACE

Location: - Al Riyadh - Saudi Arabia

Area: 1,687 m2

DESCRIPTION

According to market requirements, reflecting the characteristics of the times, best meeting the needs of users, the design is pursuing the characteristics of practical, rationality, and irreplaceability within certain limits. In this way it can also be beneficial to the sites' integrated environment, service quality and social benefits.
